PROFESSIONAL OBJECTIVE

Final-year Computing & Software Engineering student seeking a Software Engineering or Creative Technology internship. Combines full-stack and Android development experience with a working design practice — typography, packaging and apparel print — and is comfortable owning features from schema design through to interface and visual polish. Based in Colombo and available for remote work across European and US time zones.

EDUCATION

Higher Diploma in Computing & Software Engineering 2024 – 2026 (expected)
ICBT Campus, Colombo, Sri Lanka

- Core study in computational logic, object-oriented programming, algorithms and web markup.
- **CSE5009 — Web Application Development:** client–server architecture, relational schema design, RESTful APIs.
- **CSE5011 — Mobile Application Development:** native Android engineering, Firebase integration.
- Ongoing convergence of engineering practice with systematic UI design and brand artwork.

EXPERIENCE

[No prior full-time employment recorded. Add internships, part-time or freelance work here, or delete this section.]

SELECTED PROJECTS

Shima RMS — Foreign Employment Recruitment Management System In active development
Client: Shima International Agency · Role: Architecture, full-stack & UI design
Next.js 16 · React 19 · TypeScript · Supabase · PostgreSQL RLS · Tailwind 4 · Gemini AI

- Designed and built a multi-tenant recruitment platform moving candidates through a six-stage deployment pipeline: registration, documentation, medical, training, visa and deployment.
- Modelled **13 database tables behind row-level security policies**, giving eight distinct user roles scoped access to a single interface.
- Shipped **32 routes** across the eight role portals and implemented an append-only audit trail covering every privileged action.
- Integrated a trilingual AI assistant to answer candidate enquiries across the deployment process.

MediCare Plus — Hospital Appointment Booking & Records System Academic project · 5 test cases passing
Role: UI design & full-stack development
PHP · MySQL · Bootstrap · JavaScript

- Delivered a database-driven healthcare web application for a private general and specialist care provider.
- Implemented doctor profiles, appointment booking against live availability, and patient download of medical reports.
- Built dedicated dashboards for doctors and administrators behind role-based access control across **3 user roles and 6 interface pages**.
- Authored and passed 5 of 5 documented test scenarios.

TechCare Services — On-Demand Device Repair & Service Booking Academic project · 6 test cases passing
Role: UI design & Android development
Android Java · XML · Firebase Authentication & Realtime Database · Android Studio

- Built a native Android application for booking electronic device repairs across **6 interface screens**.
- Implemented registration, service catalogue browsing, category search and fault-description submission with validation on every input before it reaches the database.
- Wired Firebase Authentication and Realtime Database to manage accounts, bookings and notifications.
- Produced **4 UML and ER diagrams** and passed 6 of 6 documented test scenarios.

Independent Design Practice — Packaging, Posters & Apparel

21 works

Role: Art direction, typography and print production

Adobe Photoshop · Adobe Illustrator · Typography · Packaging · Print

- Maintain a self-directed design archive of **21 works**: 6 packaging labels, 7 promotional posters and 8 apparel prints.
- Apply one system across three output formats, each governed by a different constraint — legibility at label scale, readability at distance, and survival of garment reproduction.
- Produce print-ready exports and single-colour separations, and present work through mockups for review.

TECHNICAL SKILLS

Languages & Markup JavaScript, TypeScript, PHP, Java (Android), SQL, HTML, CSS, XML

Frontend Next.js, React, Tailwind CSS, Bootstrap, responsive design, UI design systems

Backend & Data Supabase, PostgreSQL (row-level security), MySQL, Firebase (Authentication, Realtime Database), REST API design, relational schema design, client-server architecture

Mobile Android Studio, native Android application development

Design & Creative Adobe Photoshop, Adobe Illustrator, typographic hierarchy, packaging and label design, poster composition, apparel and streetwear print, colour separation

Practice & Tools Git, UML and ER modelling, test-case authoring, print production, mockup presentation

ADDITIONAL INFORMATION

- Available for Software Engineering, Creative Developer or full-stack internship roles.
- Available for remote work across European and US time zones from Colombo, Sri Lanka.
- Academic projects assessed by written report (WRIT1) and tested against documented test scenarios.
- Portfolio and full case studies available on request.
