

Pathmasuthan Adsayan

Software Engineer & Creative Developer

pathmasuthanadsayan@gmail.com | Colombo, Sri Lanka (UTC+05:30) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Final-year Computing & Software Engineering student seeking a Software Engineering internship, ideally somewhere design matters as much as the code. Full-stack and Android developer who builds features from database schema to interface, with a design background in UI/UX, typography and branding. Based in Colombo and available for remote work across European and US time zones.

EDUCATION

Higher Diploma in Computing & Software Engineering <i>ICBT Campus, Colombo, Sri Lanka</i> Relevant modules: CSE5009 Web Application Development (client-server architecture, relational schema design, RESTful APIs) · CSE5011 Mobile Application Development (native Android, Firebase).	2024 – 2026 (expected)
GCE Advanced Level – Mathematics Stream <i>Methodist Central College, Batticaloa · 2 A passes (Mathematics, Chemistry)</i>	2023
GCE Ordinary Level <i>Methodist Central College, Batticaloa · 2 A, 5 B, 2 C (A in Mathematics and Science)</i>	2020

SELECTED PROJECTS

Shima RMS – Foreign Employment Recruitment Management System <i>Client: Shima International Agency · Role: Architecture, full-stack & UI design</i> React 19 · TypeScript · Supabase · PostgreSQL RLS · Gemini AI - Built a multi-tenant recruitment platform moving candidates through a six-stage pipeline: registration, documentation, medical, training, visa and deployment. - Modelled 13 database tables behind row-level security, giving 8 user roles scoped access through one interface. - Shipped 32 routes across eight role portals with an append-only audit trail covering every privileged action. - Integrated a trilingual AI assistant that answers candidate enquiries about the deployment process.	In active development
MediCare Plus – Hospital Appointment Booking & Records System <i>Role: UI design & full-stack development</i> PHP · MySQL · Bootstrap · JavaScript - Delivered a database-driven healthcare web app with doctor profiles, booking against live availability, and patient download of medical reports. - Built doctor and admin dashboards behind role-based access control across 3 user roles and 6 interface pages; passed 5 of 5 documented test scenarios.	Academic project
TechCare Services – Device Repair & Service Booking App <i>Role: UI design & Android development</i> Android Java · XML · Firebase Authentication & Realtime Database · Android Studio - Built a native Android app (6 screens) with registration, service catalogue, category search and fault-description submission, validating every input before it reaches the database. - Used Firebase to manage accounts, bookings and notifications; produced 4 UML and ER diagrams and passed 6 of 6 documented test scenarios.	Academic project
Design Practice – Packaging, Posters, Apparel & Branding <i>Role: Art direction, typography and print production · Case studies on portfolio</i> Adobe Photoshop · Adobe Illustrator · Typography · Print - Designed 6 packaging labels, 7 posters and 9 apparel prints, plus a logomark and packaging for a protein meal brand, each built for its constraint (label legibility, distance readability, garment reproduction). - Produce print-ready exports and single-colour separations, and present work through mockups.	Personal work

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, PHP, Java (Android), SQL, HTML, CSS, XML
Frontend	React, Bootstrap, responsive design, UI design systems
Backend & Data	Supabase, PostgreSQL (RLS), MySQL, Firebase, REST API design, relational schema design
Mobile	Android Studio, native Android development (currently learning Dart and Flutter)
Design	Figma, wireframing, prototyping, design systems, accessibility, Photoshop, Illustrator, Canva, typography, print production
Practice	Git & GitHub, VS Code, Postman, UML and ER modelling, test-case authoring
